A Russian warplane came within 40 metres of the US destroyer Donald Cook, patrolling in the Baltic Sea – in the latest in a string of “provocations” the Pentagon says could threaten NATO countries. Ships from the Alliance, including the USS Donald Cook, conduct snap operations around the Baltic Sea and airspace region as part of its commitment to collective defense. The destroyer released a warning flare in a “last resort” attempt to scare off the Russian jet – but it came too close, defence officials said. A spokeswoman for the US Navy’s Europe command said: “The US destroyer Donald Cook was in the Baltic Sea conducting a routine maritime security operation in international airspace, working with our allies to uphold the security of the Baltic Sea and the Euro-Atlantic region.” Q: File Writing In Android Application I am trying to implement a simple android app in which the text entered by the user should be saved to a file. I have created a string variable which contains the string I want to be saved and now I want to write that string to a file. But the file that I get is “empty”. Here is my code: String store; public void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.main); } public void onClick(View v) { TextView view=(TextView)findViewById(R.id.textview); view.set
